| 6 | Practice smart. Check fast. Fly safe
Flight planning made easy: CROSSorCHECK | 56 | Collision on the Julier Pass
There is a lot to be learned from the SEST's detailed investigation report |
| 8 | As far as the south wind carries
The forecasts for Tuesday, April 30, 2024, are promising. The south current is moderate and relatively constant from the eastern end of the Alpine range to the west of Switzerland. | 62 | Nothing ventured, nothing gained!
Without much hope but with a lot of courage, our author duo sets off for France. |
| 20 | Below the clouds...
...freedom is also limitless there, provided you find the „Hammerbart“. But why is cloud thermal better than blue thermal? | 72 | A success of superlatives
At the World Championships in Texas team Germany did really well. From preparation to competition, everything has to be perfect. |
| 26 | Close to the rock
At the Alpensegelflugschule Oerlinghausen, you can train everything from local flights to lee waves and cross-country flights. | 78 | Night at the Museum
After midnight, between “Schädelspalter” and “Vampyr”, you need nerves of steel to stage an extraordinary photo project. |
| 32 | Super Dimona
Our author has tested the TMG extensively and shows that it can be used not only for towing, but also for flying without thermals and even without an engine. | 86 | The optimized winch launch
What influence do the rigging and moment coefficient have on the start upwind? Part 2 of an analysis. |
| 42 | On the other site
Flying in new areas in different weather conditions – that is the appeal of cross-country flying. | 94 | „La Nena Blue“
Warm smile, blue hair – a portrait of the Italian glider pilot Elena Fergnani. |
| 48 | Solo: one engine many variants
Aircraft manufacturers and glider pilots report on their experiences with this engine. | | |
