| <p>8 As the wind blows Those who recognize good weather conditions in time and then make the most of them will discover the full fascination of gliding. Gliding is a sport that is not only popular with young people, but also with those who are not so young.</p> <p>18 Just go for it You can plan a cross-country gliding flight – or just take off and see where the wings carry you.</p> <p>26 Dancing in front of Eiger, Mönch and Jungfrau “Aerobatics,” says our author, “is not an end in itself for me. It is a tool, a safety net – and sometimes even a little game changer in your head.”</p> <p>32 Challenge at extreme altitudes The Vågå Wave Camp in Norway is something for the hardy – and offers unique experiences.</p> <p>40 Avoiding collisions – the new Powewr FLARM Flex What does the new device offer and how does it perform in everyday aviation? We investigated.</p> <p>44 Ambition and fun in a twin pack Up close and personal: 44 teams brave the heat wave at the German Championships in the 20m double-seater class in Brandenburg.</p> | <p>52 Thermals made visible – but what does it look like now? An insight into modern wind measurement technology using Doppler lidar.</p> <p>60 Start interruption at the winch In our HOW TO series, we provide information on basics, risks, and pilot errors.</p> <p>66 Search. Find. Arrive. Join us on an eight-day hiking and sailing trip, the first part of which leads from Langenfeld via Scharnstein to the Engadin.</p> <p>76 The Evolution of Variometers, Wind Detection and the HAWK Breakthrough The development of gliding instruments is an exciting story. We spoke with Erazem Polutnik (CEO of LXNAV).</p> <p>80 Inspire passion We follow the glider training of a young pilot in Canada.</p> <p>86 The optimized winch launch, part 5 How does the rope length influence the achievable release height?</p> <p>92 Thermal with ocean views L'Aquila in central Italy offers a view of both the Tyrrhenian Sea and the Adriatic Sea from the air.</p> |
