

Title: Patrick Gabler

Picture: Mathias Schunk

8	Safety in Gliding A lot has changed, both in terms of technical capabilities and training – has this led to improved safety?	58	Training, Aircraft Variety, and History The aerobatics days in Kamen, it was above all the atmosphere that carried the week.
10	Are Glider Pilots better Airline Pilots? What benefits does glider training offer a future commercial pilot? Two incidents from the recent past may provide an answer.	62	Just Don't Give Up The fourth part of our cross-country gliding trip begins with drizzle and ends... back in Samaden.
16	Spanish Summer Thermals Normally, you'd expect mountain thermals from fall through spring – but there are exceptions.	68	Optimise Watter Ballast in 5 steps How much water ballast should you use on any given day? This is not an all-or-nothing type of tool.
24	Tandem Towing Airplane towing is teamwork—you should be aware of each other's aerodynamic limits.	72	Hiddedn Cost of Chasing Better Lift In cross-country gliding, efficiency matters more than absolute climb rates.
30	Mentally Strong in Competition Dealing with mental pressure in competition is something you can train for. We'll take a closer look at how, together with a mental coach.	76	When the Wing Spinner Sacrifices Itself A defined predetermined breaking point prevents structural damage during an off-field landing.
38	Between the Wadden Sea, Thermals and the Temptation of Helgoland Some flights aren't measured in kilometers. They're measured in memories.	78	Success with a Long History Jonker Sailplanes from South Africa has an exciting history behind it.
44	Inside a Thermal Modern LiDAR measurements offer deep insights – into the diverse inner workings of a thermal.	86	Take Off, Fly, Honk, Land In the open cockpit of the T 21 Slingsby over Worcester.
50	More Than Just a Rectangle The traffic pattern – an underrated airspace.	92	Nuremberg's Own Wasserkuppe 100 Years of Gliding at the Hesselberg
